

# Cloud Development Tools Steering Committee Agenda

## Future Topics

- Start TheiaCon Planning
- Contributor award Q4/2024: TypeFox For Open Collab Tools
- Contributor award Q1/2025: Next EclipseSource for Theia AI
- Quarterly: update on program plan, budget
- Ongoing: Regular Open VSX check ins / sharing of reports
- Ongoing: Continue to review [member leads](#) and alert of any other potentials
- Yearly: review WG antitrust guidance

For next agenda

- SDV intersections
- ~~Modernization IG~~
- ~~ORC Working Group~~
- ~~OIN (Frederic Feb 6)~~

**Apr 10, 2025**

Discussion Topic	Moderator(s)	Mins, link
Quorum and minutes taker	Host	2
Minutes from March 6, 2025 review (below)	Host	5
Vote on the gitlab tracker way of working for eCDT PM <ul style="list-style-type: none"><li>- CDT <a href="#">PM Board</a></li><li>- CDT <a href="#">Pipeline</a> Board</li></ul>	Thomas	5
Olivier Prouvost as Guest (the role of Eclipse IDE Community Mentor)	Olivier	5
Marketing discussion <ul style="list-style-type: none"><li>- Open Community meetups - <a href="#">presentation</a></li><li>- Actions! pitch deck (internal &amp; external EF), conferences, amplification strategy(ies)</li></ul>	Thomas	10
Membership pipeline discussion	Thomas	5
Marketing update	Jonas	5
AOB	various	---

**\*\* - Items added after publishing of the agenda. Can be discussed only, no vote, if attendees agree.**

## Attendees

Name	Organization	Attended This Meeting
Mélanie Bats	Obeo	x
Cédric Brun	Obeo	
Hans-Ake Gustafsson	ST	
Kostiantyn Kirenko	ST	x
Jonas Helming	EclipseSource	x
Tim deBoer	Red Hat	x
Rob Moran	Arm	
Miro Spönemann	TypeFox	x
Matthew Khouzam	Ericsson	x
Mark Goodchild	Renesas	
Jonathan Madsen	AMD	
Ammar ElWazir	AMD	
Tony Tye	AMD	
Thomas Froment	Eclipse	x
Clark Roundy	Eclipse	
Sharon Corbett	Eclipse	

## Minutes Taker Schedule:

Jan 9, 2025	Ericsson	Jul 10, 2025	AMD
Feb 6, 2025	Renesas	Aug 7, 2025	Arm
Mar 6, 2025	TypeFox	Sep 4, 2025	Red Hat
Apr 10, 2025	ST	Oct 9, 2025	Ericsson
May 15, 2025	Obeo	Nov 6, 2025	Renesas
Jun 5, 2025	EclipseSource	Dec 4, 2025	TypeFox

## April 10

No quorum from the beginning, the meeting minutes from Mar 6 2025 were not voted.

Welcoming Tanja Obradovic.

- From the beginning of work with EF, was working with Jakarta EE.
- Looking for synergies.

[Thomas] presented the GitLab tracker.

- GitLab tracker was introduced already at the previous meetings.
- As a side note, [Matthew] was impressed by the new Zoom capability to show multiple shared screens on the individual tabs.
- [Thomas] mentioned that not everybody has access to the GitLab tracker, the work to give access is in progress.
  - Matthew and Jonas has access, please refer to them in a case of need.
- Pipeline board at GitLab was presented.
- [Jonas] made some comments:
  - He likes the board, use it, added some issues already.
  - TI case study presentation, one of the items at the board, was discussed.
    - The presentation is very good in general.
    - But PDF is not the format of preference for such presentations.
    - The lead time to publish the presentation was 6 months, which is quite a lot.
    - 1.5 months is the maximum lead time for such a work.
    - Otherwise such information will be distributed using other channels, such as Theia site itself.

- [Thomas] made a comment that he doesn't know yet why it took so long, he will take a look.

[Olivier Prouvost] was introduced as a community mentor.

- His job is to make onboarding of the new members easier.
  - Facilitate the new contributors to EF.
- The idea is to summarise all the important topics on a single site.
  - <https://github.com/eclipse-ide> is now the place for the important information.
  - <https://eclipseide.org> - this site was previously dedicated for downloads, now the idea is should become a landing page for IDE developers.
- General role of Olivier is to engage new contributors.
- [Jonas] mentioned that he is very happy with the current contributors flow for Theia.

Marketing discussions and updates were in focus.

- [Jonas] is happy with the current marketing progress.
- [Jonas] shared a list of selected articles highlighting the most interesting updates from the marketing:
  - Theia AI press release:  
<https://newsroom.eclipse.org/news/announcements/eclipse-foundation-unveils-theia-ai-advanced-open-source-ai-innovations>
  - Best article around the press release:  
<https://thenewstack.io/eclipse-theia-the-deepseek-of-ai-tooling/>
  - SCANOSS Integration:  
<https://eclipsesource.com/blogs/2025/03/20/scanoss-integration-in-theia/>
  - Today, Theia 1.60 release:
    - [https://www.linkedin.com/posts/eclipsesource\\_eclipse-theia-160-release-news-and-noteworthy-activity-7316037262364880896-DFVZ?utm\\_source=share&utm\\_medium=member\\_desktop&rcm=ACoAAAwzQXsBtvkcXRq8vngBq1T\\_7bal6N\\_jL5U](https://www.linkedin.com/posts/eclipsesource_eclipse-theia-160-release-news-and-noteworthy-activity-7316037262364880896-DFVZ?utm_source=share&utm_medium=member_desktop&rcm=ACoAAAwzQXsBtvkcXRq8vngBq1T_7bal6N_jL5U)
    - <https://eclipsesource.com/blogs/2025/04/10/eclipse-theia-1-60-release-news-and-noteworthy/>
- [Thomas] added a link.
  - “Should add the video of Theia coder:  
<https://www.youtube.com/watch?v=J1FECv6emEq>”
- [Jonas] updated the link.
  - “Video that Thomas was referring to:  
<https://youtu.be/J1FECv6emEq?si=wCdYolkSWpRe4Dos>”

The information about a meetup will be shared by Thomas on the next meeting.

Membership pipeline was mentioned.

- [Thomas] will continue to work on it.

AOB

- [Konstantin] announced his upcoming resignation from ST Microelectronics. His last meeting at ECD WG will be on 15th of May.

## Mar 6

We have quorum.

Minutes from Feb 6, 2025 are approved.

Juan gives us a brief overview of the [Open Regulatory Compliance Working Group](#): the [Cyber Resilience Act](#) is a major focus.

Juan gives us a brief overview of the [Oniro Working Group](#): adaptation and integration of Open Harmony (Chinese open source project at [OpenAtom Foundation](#)) for the European market.

Thomas takes the Program Manager role from John. Thomas shows us his workflow for translating the Eclipse IDE program plan into epics on the respective GitLab project.

**Question:** is it ok if Thomas uses the same approach for the Cloud DevTools WG?

- No objections. Thomas will give us access to a GitLab project.

Matthew says a new working group about Strategic AI is in the making, but there's nothing official yet. There is overlap with our projects, specifically Theia AI and Open Collaboration Tools.

As already voted on last year, the Contributor Award Q1/25 goes to EclipseSource for Theia AI.

Thomas is starting to look into opportunities for outreach. Supporting local meetups could be good, maybe with remote presentations – e.g. in India. Being located in Europe, Thomas can visit events in this area more easily (compared to John earlier).

Jonas announces a press release about Theia AI next Thursday.

## Feb 6

**Tony and Ammar** introduce themselves. Tony worked on debugging in the past and now profiling. Ammar is also currently working in the profiling area and using Trace Compass tools. Located in Austin, Texas.

### Open Invention Network - Frederic Desbiens

Open Invention Network a standalone organization.  
Protection for patent and open source component registration.  
Stepping up efforts to defend the open source software.

If the tools can run on Linux then they can be included in the list.  
Packages submitted are checked by the legal team to see if they can be included.  
Updated every 18-24 months. Table 13 (revision 13) is closing fast.

Eclipse Theia or Che could be added to the list.  
Companies can also consider joining the OIN.

Jonas: Any argument for submitting all projects in the working group?

Frederic: We do not want to flood the OIN with all the Eclipse projects.

Jonas: There are about 7 strategic projects the working group members are using.

Frederic: Then perhaps all 7 makes sense for the Eclipse Cloud Tools Group.

Action: Should have a discussion asynchronously in the meantime. John Kellerman will write a message to the mailing list to start the discussion with projects. Hard deadline is mid-February.

<https://docs.google.com/presentation/d/1Xn7RrPGbzSWmHIDC9LFoOIFjxVLLrdJBSpayvMRxgs>

The specific version of the software needs to be mentioned.

### **Steps forward for OpenCollab Server**

- <https://gitlab.eclipse.org/eclipsefdn/helpdesk/-/issues/5243>

Eclipse Foundation will be funding it.

However the working group will need to run it.

Miro will take another look at this next quarter.

Some work is ongoing such as updating the website to show the new governance.

Need some clarity before taking steps with deployment, committer access lists and so on.

Some concern over mistakes causing a large cloud bill. Technical measures on the cloud side should avoid this. Tricky when committers could have access to cause errors and high costs.

Transfer will happen soon, we hope.

### **Modernization Strategic IG**

Not only part of one working group. Joint venture between the Cloud Tools WG and IDE WG.

Focus of this is toolchain modernization.

<https://projects.eclipse.org/interest-groups/toolchain-modernization-strategy-interest-group>

People looking at existing toolchains and deciding what to do next.

Not a migration working group - instead looking at modernization. A way to modernize existing tools built on legacy/older software or look to different web-based technology stacks.

IDE WG is also doing some modernization work in their activity.

Free to join if you are an existing Eclipse member. It is an interest group rather than a working group.

<https://www.eclipse.org/collaborations/interest-groups/#3-what-are-the-major-differences-between-interest-groups-and-working-groups-how-do-i-choose-which-is-right-for-my-initiative>

The IG is at the crossroads between the 2 existing working groups.

Tim mentions AI tooling to help migration from one technology to another. This is included in the IG remit.

Subscribe the mailing list and you are in the gang.

### **Welcome Tony and Ammar (AMD buddies)**

Facing issues with Trace Compass and Theia integrations in the future.

Tony: Visualization of traces and telemetry

Collecting knowledge to help facilitate transition to Eclipse Cloud Tools projects.

### **AOB**

John Kellerman is leaving the working groups and Thomas Froment will be taking over from John.

Both the Eclipse Cloud Tools WG and Open VSX WG.

Everyone offers their thanks for the hard work and contributions.

## **Jan 9**

1- Mikael Barbero- SBOM - Software bill of materials:

<https://eclipse-csi.github.io/security-handbook/sbom/index.html>

[https://docs.google.com/presentation/d/12oEuHSUappENnDtZ2tXcD0\\_wh1nCx8NaFiD9YG89Aal/edit?usp=share\\_link](https://docs.google.com/presentation/d/12oEuHSUappENnDtZ2tXcD0_wh1nCx8NaFiD9YG89Aal/edit?usp=share_link)

Primary goal: enable timely responses for vuln incidents.

Secondary goal: offer projects ability to documents their non-vulnerability.

Working w/ Wayne to align dash and SBOM.

- \* Document and promote best practices

- \* Support early adopters

- \* Establishing sbom registry

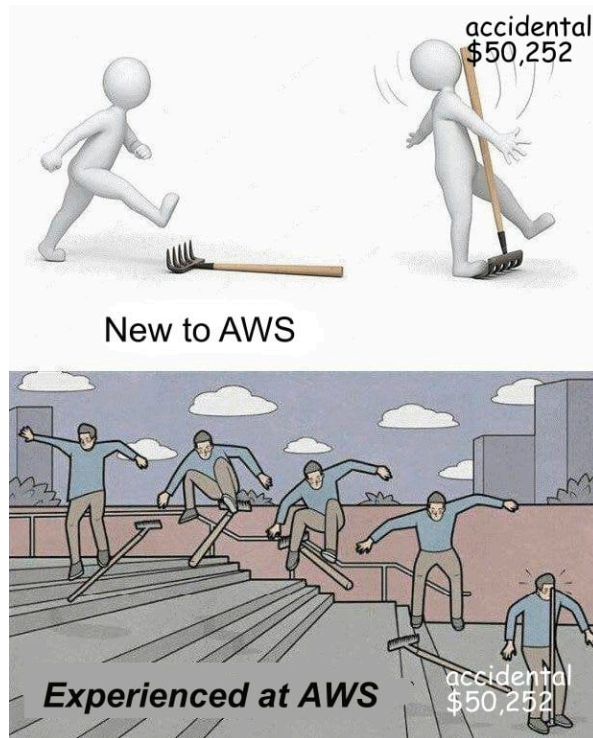

2- Minutes for dec 12 approved

3- TypeFox has the OpenCollab server.

Eclipse takes over cloud account and funding, Dev and Ops handled by the working group. This is a new model that would help for new projects.

Gitlab issue. <https://gitlab.eclipse.org/eclipsefdn/helpdesk/-/issues/5243>

Things will start slow, typefox will ramp up efforts in Q2.

Kostiantyn fears this:

The code so far is low reqs, as it's just a "matchmaker".

Request: JavaOne and JavaLand: Should we sponsor it? Can we take advantage of the foundation to go to important trade shows?

- Kostiantyn : We need to distance ourselves from Eclipse / Java for branding reasons.
- Tim: What are all the conferences that the project would like to go to? Maybe sponsor where we go and re-enforce our presence. Che/JKube may have interest w/ Eclipsecon. MAYBE JavaOne
- John: Let's do a slack to discuss conferences. Top places: Regulatory Compliance, SDV and AI.

#### Marketing Academic

- Miro: Concerned by paywalls.
- John: Let's look at a specific example.
- Miro: Increasing the reach of academic work is good. Limits to what can be done w/ Papers. Technical reports are another issue.
- Mitigated yes: look for an example.

AOB

## Dec 5

Sharon: Shares the proposed financial forecast for 2025. <Add link here>[https://drive.google.com/file/d/1YodMPacFoRPFkxg-v80R8EdS-XRhunfa/view?usp=drive\\_link](https://drive.google.com/file/d/1YodMPacFoRPFkxg-v80R8EdS-XRhunfa/view?usp=drive_link)

Proposed forecast is the same as 2024.

Suggestion for improved feedback on what has been achieved during the year. John suggests at least mid-year.

John mentions his cross-group opportunity spreadsheet. John agrees to share this.

Frederic - IOT, etc: openHarmony - Theia, C compiler, Make for a hackathon and failed. John has asked him for some feedback on the problems he faced.

Steps forward for OpenCollab Server

Discussions in the GitLab issue. EF to take over the OpenCollab server. Take over the google cloud account. 1-2K Euros per year. This is the request for the WG to agree on. Cloud infrastructure owned by Eclipse but the sub-set of the committers get access to operate it.

John will go to the GitLab issue again and review/refine so it is clear who is doing what and everything is listed.

Request: JavaOne (\$5K) and JavaLand (\$2K) Sponsorship collaboration question

Does the Cloud IDE WG want to partner/sponsor a booth?

John: We don't have the budget to do this. One or more companies would need to think it is important and sponsor it.

Matthew: These conferences do not seem to be particularly well suited to these WG.

Thomas: What would be a good conference for Theia? Jonas: more likely something in the web arena

Matthew: Would like to see a stronger presence within embedded. Members here are building tools for embedded and there are other opportunities.

OCX youtube videos are coming. <Add link>

TheiaCon youtube videos are out. <Add link>

AOB:

Jan 9, 2025

Quorum and minutes taker

- We have quorum, Ericsson taking minutes

SBOMs and Eclipse

- Mikael Barbero presented on work EF is doing to support SBOMs for EF projects
- Goal is to understand dependencies, handle vulnerabilities, keep track of licenses
- [link to materials]

Minutes from Dec 12, 2024 review (below)

-

Steps forward for OpenCollab Server

- <https://gitlab.eclipse.org/eclipsefdn/helpdesk/-/issues/5243>

Request: JavaOne (\$5K) and JavaLand (\$2K) Sponsorship collaboration question

In general, at what shows do we want participation?

Upcoming publications

TI Case Study (in layout)

AI press release (need to consider timing)

Marketing academic publications? (vote if quorum)

AOB

**Nov 7**

**Miro: Widening is good. We need to reach more people**

Jonas: Theia was super well represented. 12 talks, (2 bofs, 9 theia talks, one sdv theia talk)  
Marketing was great. Missed opportunity. Theia nor working group not mentioned. Theiacon not mentioned by ef. EF was not aware of Cloud Dev Tools. One talk about theia didn't show theia. Internal communication could be improved.

According to Jonas: Every EF employee should be aware of the events and working groups, as well as projects.

Miro: This is an organizational issue, since the wg didn't participate, as sponsors we have influence there was participation by program managers, but this is indirect influence. The WG should be represented as a sub-organization. Is there a way to have the WG more in the foreground? Can we platform them?

Rob: Venue is nice... but walking 1.6 km to the hotel is problematic.

Konstantyn: Not enough street lights. Widening the conference is good. Conflicting sessions is a positive. Cross references to other confs. JakartaEE/Theiacon/an overview talk would be good. Very big problems of cross referencing, we need to promote Open-VSX for instance. Core repo of cloud-dev-tools, che is presenting they didn't mention vsx. Theia-Ide could have had more mentions and mention VSX. You need to know about something to be involved in it. Agendas need to be archived and searchable. 404 errors on website. Map of working groups. When there are evening sessions, like bofs there need MORE SANDWICHES. HOW DARE YOU LET ENGINEERS STARVE! WE ARE FAR FROM SANDWICHES.

Clark: OCX is a venue to tell our story. Opportunity with a collaboration booth.

**October 10 Minutes**

- Quorum: confirmed
- Follow Matthew with the compass!

- Kosta does not approve LLM minutes ;-)
- Review of program plan
  - Resolved several comments in the doc and reviewed everything
  - Discussed adding OpenCollab tools, still in review
  - Spent time finessing Theia plans
  - Shifted community to include more focus on external promotion
  - Program plan approved
- Initial preview of budget (reviewed 2023/24)
  - Do we attempt to plan for OpenCollab hosting budget? Not clear what costs might be and what is actually under the WG
  - Current 50 Euro/month
  - Confusion over formatting of sums cleared up
- OCX
  - Several options available for discounted academic passes
- TheiaCon
  - Submissions closed. Excellent submissions including a good variety and 3 good adopter stories
- Contributor award -
- Discussions around domain specific IDE configs
  - Coming discussions with other Eclipse groups, EclipseCon would be a good place to have them
  - Maybe extension packs?
  - Reminder that members can join this meeting as guests
- Theia outreach
  - Suggestion for Jonas to talk to Clark... but we need options
  - How to do developer advocate/outreach on a budget?
  - We have the technical content - Theia AI, collaboration tools, etc
  - Look at existing contacts, how we get the message out
- Hit 1h - no more topics!

## Sept 5 Minutes:

ARM took minutes, they were great. Suggested minutes [below](#) generated by LLM

## Jul 11 Minutes

- Quorum: confirmed
- Gael Blondelle introduces the [OS Regulatory Compliance Working Group](#) (proposed)

- Miro and Clarke provide an Update about OCX & EclipseCon 2024 update (Join [these speakers at Open Community Experience \(OCX\)](#))
- Jonas provides an update about Theia IDE, release was successful, download are now 10 times more than before.
- TheiaCon: Date will be November 6th and 7th, PC will be formed by Jonas
- Jonas nominates for the Contributor award: Hans-Ake, Kostyantyn and Olaf for openVSX, see [here](#), John will take it up from here
- Carmen introduces the [Temurin Working Group](#) and Adoptium
- The discussion is started whether the Theia IDE should be rebranded to have a separate name to Theia the platform. Members are asked to think about this and potentially good names.

## Action Items

### Done

- Clark will propose a date for TheiaCon 2024 in January
  - Date will be November 6th and 7th,

### New

- John to publish the contributor award for Q3/2024
- Clarke to prepare theiaCon website and CfP and submission form
- John will write a blog post about the fact that almost all popular VS Code extensions are available on openVSX (he gathered statistics)
- <https://github.com/eclipse-theia/theia/issues/12693> Drink our own champagne (reminder)
- <https://ecdtools.eclipse.org/resources/cdt-cloud-sig/> update(retirement, action item on John)
  - <https://gitlab.eclipse.org/eclipsefdn/it/websites/eclipse.org/-/issues/260>
- What's the difference between <https://www.eclipse.org/topics/ide/> and <https://www.eclipse.org/ide/> ? (second only available through search). Also need a visual indication of more.
  - <https://gitlab.eclipse.org/eclipsefdn/it/websites/eclipse.org/-/issues/444>
- [Melanie] Modeling SIG follow up (will get to this in October)
  - Will discuss at EclipseCon
- Invite other communities, **ThreadX (new)**, SDV, Oniro and OpenHW to Theiacon.

## Jun 6, 2024 Minutes:

- Quorum: Confirmed
- Previous Minutes: Previous meeting minutes were approved.
- Invitation to the meeting: it was mentioned that some people still have the meeting scheduled every two weeks, with the next meeting on 20th of June.
  - John will remove all the meeting requests and create a new one.
- SDV Community Day by John
  - John proposed everybody interested in cross-team cooperation to participate.
  - TypeFox and Eclipse Foundation representatives are supposed to participate.
  - SDV has a big experience in development tools and integrated development environments, and ECD cooperation with them looks reasonable.
  - Matthew mentioned that ThreadX is now a part of SDV, and that ThreadX needs a toolchain and a modeling solution.
- OCX & EclipseCon 2024 update: there is neither Miro nor Clark at the meeting, so the update will be done at the next meeting.
  - Otherwise, the work is in progress
- Marketing Update: Jonas is not at the meeting
  - Regarding Theia, it is planned to be released on 13th June and be based on version 1.50
- The next meeting will be on 11th of July.

## May 23, 2024 Minutes:

- **Quorum:** Confirmed
- **Previous Minutes :** Previous meeting minutes were approved.
- **Presentation:** Metalware by Ryan Chow
  - Overview: Ryan Chow was invited to present Metalware to the Working Group.
  - Topics Covered:
    - Developer tools for hardware
    - HDL copilot
    - Firmware drivers : Auto-generating peripheral drivers from datasheets
    - Leveraging LLM IA technologies
    - Utilizing Theia and open VSX
    - Business Model
- **OCX** by John
  - Miro was not present.

- Call for proposals is currently out.
- **Marketing Update** by Jonas
  - Contributor award was given to Rob Moran & his team.
  - Press release for Theia IDE leaving beta in two weeks.
  - Two adopters of Theia identified:
    - Oracle cloud code editor (contact: Matthew)
    - Texas Instrument for CC Studio (contact: Jonas)
- **SDV Update** : This topic was skipped due to lack of information. John sent more information later on Slack:
  - Working with the SDV working group to look at areas of collaboration. The most likely areas are the emerging efforts to define metadata for orchestration and tool integration, and an open source stack including tooling.
  - Information on engaging: <https://sdv.eclipse.org/get-engaged/>. I'd recommend getting on the mailing list and the Slack channels. The SDV calendar is also a good resource. Specifically, the calls most likely to be interesting to us are the Technical Alignment call and the Blueprints call.
  - Two day SDV Community meeting, June 5 and 6. It's a meeting open to all. Someone from TypeFox should attend.
- **Eclipse Updates** by John :
  - New Members and Revenue:
    - Overview of new members and revenue updates.
    - Staffing and active committers/contributors discussed.
    - Working group membership details.
  - Open VSX:
    - Availability and growth of published extensions.
    - Top publishers and most downloaded extensions, with Python leading.
  - SDV new members
  - EU Cyber Resilience Act
  - AOB (Any Other Business):
    - IoT & Edge adoption survey.
    - Privacy policy update.
    - Sponsorship program for Open VSX, including badges.
- **AI Application in Tool Space** : Open discussion
  - Exploring AI & IDEs and their intersections within the Working Group.
  - Several talks on this topic are proposed for OCX.
  - Common support for AI use cases beneficial for tool platforms like VS Code extension API and Theia.
  - Aim to make tools more transparent and flexible, allowing developers to choose their LLM and strategy.
  - Encouraging different vendors to contribute and provide extensions.

#### **Apr 4, 2024 Minutes:**

- Minutes approved,
- we have quorum

- **Antitrust update:** we have an obligation to conduct ourselves in the proper way. This is a reminder.
- Permissions need to be fixed.
- **OCX** No updates, Program committee established, topics defined. No news since last month.
- Reminder: Open Code Experience (<https://www.opencode-x.org>) is the new name / brand for the
- Foundation's conference, with four colocated sub-events: Main OCX Tracks, EclipseCon, Open
- Code for Automotive, Open Code for Java. Eclipsecon itself is a sub-event where the community will meet.
- **Marketing** No update, John will publish soon.
- AOB: Meeting minutes not sent??? Move the next meeting to May 16th.

### Mar 21, 2024 Minutes:

- February 15th meeting minutes approved and no objections.
- Download stats for Theia IDE: 9000 in two months
- Theia Community call happened last week; ~15 persons beyond the usual suspects
- Published blog post:  
<https://blogs.eclipse.org/post/john-kellerman/code-realtime-harnessing-power-eclipse-cloud-devtools-ecosystem>
- Q1/24 Contributor Award goes to Marc Dumais:  
<https://blogs.eclipse.org/post/john-kellerman/eclipse-cloud-devtools-contributor-award-marc-dumais-simplifying-license>
- New application based on Theia: Oracle Code Editor  
(<https://www.oracle.com/devops/code-editor/>)
- Guest: Thomas Froment, Program Manager at the Eclipse IDE Working Group
- John and Thomas invited each other to their respective WG meetings to identify opportunities for collaboration
- Open Code Experience (<https://www.opencode-x.org>) is the new name / brand for the Foundation's conference, with four colocated sub-events: Main OCX Tracks, EclipseCon, Open Code for Automotive, Open Code for Java
- EclipseCon is now the event for everything tool-related at Eclipse: Eclipse IDE, Eclipse Platform, all Cloud Dev Tools, Open VSX
- There won't be a community day, but EclipseCon will be where our community will reside
- Cloud DevTools and Eclipse IDE have many things in common, being foundation layers where other working groups / communities / products can build upon; therefore the collaboration is very welcome.

### 15 Feb 2024 Minutes:

- Quorum established.
- January 18th meeting minutes approved and no objections.

- Minutes need to be sent out. Action item: John will send out the old minutes that have not been shared. Draft meeting minutes go out on the slack channel. The approved minutes from Jan 18th will go out on the email distribution list. Matthew will send out Jan 18th meeting minutes.
- Strong.network welcomed.
- Microsoft Live Share - closed need to use their service. Typefox developed - Live share based on an open protocol. Implemented mainly for code editing but could be adopted for any editor type. Neutral infrastructure perhaps implemented for the Theia IDE. Server infrastructure needed for messaging infrastructure.
- Matthew: How much data is used in "try Theia" feature on the website? Limited to 30 mins. 100-150 sessions per day. Jonas: Thinks the cost is potentially very low due to small data messages.
- Theia Community meeting in March, March 14th 4pm. Anyone interested in an adopter story presentation let Jonas know.
- Action item: Can Jonas provide some sentences to John about this Community meeting so he can post on his blog?
- Prepare for a press release for the Theia IDE and/or the collaboration support. Jonas prefers to split these as they are both important achievements. Jonas will start to prepare these press releases.
- Theia IDE now has an early adopters area so we can test before the main release. Feedback from users is good.
- Matthew: Cross workgroup collaborations - engaging with ThreadX group. Are there other people doing a similar effort? Need to ensure these groups know we exist. Try to reduce the silos in the Eclipse Foundation. Could the ThreadX team use CDT Cloud? - Perhaps CDT Cloud could suggest new views for the ThreadX team. John is also chasing open hardware and SDV.
- John mentions EclipseCon turning into the OpenCode conference in October. Should be thinking on domain specific Theia oriented projects for each track.
- 2024 Program Plan - John runs through the plan. Looking for opportunities to try and engage with adopters that are not part of this working group. Maybe see after the first Community Meeting what happens. Matthew: Should we make meetings customized for different use-cases?
- Action Item: Next month's meeting is right after the Theia community meeting - review the concept of community calls perhaps domain specific after the community meeting.

## Jan 18, 2024 Minutes:

- Quorum established
- Welcome guests from Argonne National Lab
- December 7 Minutes
  - Approved with one modification - Matthew was not in attendance
- Contributor of the year
  - SC approved TypeFox and EclipseSource as Contributors of the Year for 2023
- Marketing update
  - Working on an adopter's story
- Theia the IDE Update
  - Release effective of about 2 weeks ago
  - Beginning to get good feedback through bug reports
  - Looking for feedback
- Program Plan for 2024
  - Does it make sense to have Theia exist at same level of Eclipse IDE
  - SEO on 'Eclipse IDE' and where does Theia show up
  - Looking for connections to other working groups
- Archive action cleanup
  - Cleaned up all previous and new actions
  - Agreed to evolve from contributor of the month to contribution of the month and to move to quarterly
- What's the difference between <https://www.eclipse.org/topics/ide/> and <https://www.eclipse.org/ide/> ? (second only available through search)
  - Also need a visual indication of more
  - John to create Gitlab issue for this

## Minutes of the CloudDev Tools Working Group Meeting

**\*\*Date:\*\*** September 5, 2023

**\*\*Time:\*\*** 10:00 AM - 11:30 AM

**\*\*Location:\*\*** Virtual Meeting (Zoom)

### *Attendees:*

- Alice Johnson (Facilitator)
- Bob Smith (Note Taker)
- Clara Lee
- David Patel
- Emily Chen
- Frank Gonzalez

### *Agenda:*

1. Welcome and Introductions
2. Review of Previous Meeting Minutes
3. Updates on Current Projects
  - CloudDev Tool Integration
  - User Feedback Implementation
4. Discussion on Future Features
5. Action Items
6. Next Steps and Scheduling the Next Meeting

---

#### #### 1. Welcome and Introductions

- Alice welcomed everyone and conducted a round of introductions for new members.

#### #### 2. Review of Previous Meeting Minutes

- Bob reviewed the minutes from the August 22, 2023 meeting.
- Minutes were approved without amendments.

#### #### 3. Updates on Current Projects

##### - \*\*CloudDev Tool Integration\*\*

- David provided an update on the integration progress with existing cloud services. He reported a 75% completion rate and expects final testing to begin by September 20.

##### - \*\*User Feedback Implementation\*\*

- Emily shared insights from user feedback collected in August. Key areas for improvement identified included user interface simplification and additional documentation.
- Action Item: Emily to compile a detailed report on feedback by September 12.

#### #### 4. Discussion on Future Features

- Frank proposed the addition of a collaborative coding feature. Members expressed enthusiasm and discussed potential implementation strategies.
- Clara suggested exploring integration with CI/CD tools. The group agreed to prioritize this in the upcoming sprints.
- Action Item: Clara to draft a feature proposal document by September 15.

#### #### 5. Action Items

- Emily to compile user feedback report by September 12.
- Clara to draft a feature proposal document by September 15.
- David to schedule a follow-up meeting for final testing discussion by September 20.

#### #### 6. Next Steps and Scheduling the Next Meeting

- The next meeting was scheduled for September 26, 2023, at 10:00 AM.
- Alice encouraged members to come prepared with updates on their respective tasks.

#### #### Adjournment

- The meeting was adjourned at 11:30 AM.
